

A Message from the Governor

The surface transportation program for Fiscal Year 2015 is part of a continuing plan to preserve and to improve the highways and bridges in our state.

Our transportation routes are important for the movement of people and freight. Our highways and interstate system contribute to the Nebraska quality of life. Improvement projects for FY-2015, as well as those we are working on for upcoming fiscal years, are ongoing efforts to provide a safe, efficient and reliable network throughout Nebraska.

I want to thank all of the transportation workers, the cooperative partners in the industry, and the supportive highway users. We all want to make Nebraska roads safer and dependable for everyone.

Dave Heineman
